

The Most Revolutionary Chute Design in 40 Years!

Cattlemaster 1100

Chute operates from 30" to less than 15" inside dimensions.

Operators & handlers can move both forward & aft with no handle or lever obstruction.

No moving parts attached to the floor.

Each steel moving part is greaseable via zerks. All other moving parts roll or slide on indestructible nylon.

Unequaled access to animal from the front, or the sides, or the back.

Branding doors swing out and are removable - no tools needed.

Palpation door travels with side squeeze creating a funnel to eliminate small animal turn around.

Innovative design features include ease of operation for the user in turn providing less stress on the livestock.
